- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____ 6) ☐ Other:

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 17 and 18, drawn to an optical communication system, classified in class 398, subclass 51.
 - II. Claims 10-16, drawn to a photonic cross connect device, classified in class 385, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group I does not require the particular features such as "lithium niobate optical switching system" or "liquid crystal optical switching system" for its patentability. The subcombination has separate utility such as the subcombination can be used in display device or illuminating device for decorating purpose but not for optical communication.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung N Ngo whose telephone number is (703) 308-0297. The examiner can normally be reached on M-F (8:30-5:00).
